

2014 Montana Government IT Conference

Under the Hood Tech Sessions Gallery Room

Wednesday December 10, 2014

10:15-11:15 “WebDefend Web Application Firewall”

Presenter: Kevin Mayoros, Product Manager, **Trustwave Inc.**

Web applications have evolved from simple sites containing non-critical information to complex multi-tiered applications at the forefront of business. With that, core business data is now exposed on public networks creating an opportunity for cyber criminals to steal it. Web application security is no longer optional. It is now an essential part of doing business on the Web. See how WebDefend (WAF) can give you that visibility into what happening to you site.

1:45-2:45 “Managing your Unstructured Data with Varonis Systems”

Presenter: Kevin Santarina, **Varonis Systems**

Gain Visibility and Control over your unstructured data across multiple platforms; Windows File Shares, Exchange, Sharepoint, Active Directory, SAN and NAS devices. Quickly address questions such as:

- Who has access to the data? What level of permissions do they have and why?
- What are users doing with that Access? (audit history)
- Where am I oversubscribed with access? (Global Access Groups, Everyone, etc.)
- Who is the Data Owner?
- Where does the Stale Data reside on my network?
- Do I have sensitive / classified data on my network? Who has access to it, who is accessing it and what are they doing with it?

3:00-4:00 “Integrating with E-Pass Montana”

Presenters: Greg Snortland, **Montana Interactive**
Denise Adamson, **SITSD**

This presentation will give an overview of how to integrate a .Net service with ePass Montana. Discussion Topics include:

- What is ePass Montana?
- What are the benefits of using ePass Montana?
- How do you get started with ePass Montana?
- Understanding ePass SSO and more.

2014 Montana Government IT Conference

Under the Hood Tech Sessions Clark Room

Thursday December 11, 2014

10:15-11:15 “Top Five Ways to Add Value to your DNN Website”

Presenter: Rennan Rieke, **SITSD**

Learn to use advanced DNN modules, and see demonstrations of SITSD’s Most Popular DNN Modules. We will focus on the top five most popular modules. We will show you how to use some of DNN’s flashier, bigger bang-for-the-buck components and functionality.

1:15-2:15 “The Software Developer's Challenge: Securing Applications and Application Servers”

Presenter: Karen Ohlin and Barry Fox, **State of Montana**

This session is presented by two software engineers with a combined 60 plus years of experience as IT professionals. They take a holistic approach to look at many security aspects that should be considered when developing software. The session will cover heuristics and best practices pertaining to hardening software applications and applications servers.

3:00-4:00 “Agile Software Development (Geeks and Other Peeps)”

Presenter: Kevin McManus, **VP of Technology Solutions IKUW**

The agile philosophy places the focus on the true engine of software development projects, the people. Explore the best practices of software development and how they relate to the core values and principles of the agile philosophy. Learn how design patterns, anti-patterns, coupling and cohesion, emotional intelligence and the expectations/accountability loop can lead to amazing software.
